

Hills Reliance

One choice to protect your business premises and assets

**You have worked hard to build your business.
Protecting it is a high priority.**

The Hills Reliance security system is designed to meet the demands of safeguarding your assets. Equipped with advanced and reliable technology it allows you to focus on growing your business, especially during these challenging times.

The Hills Reliance – Keeping your business safe and protected.

One Choice to protect your business and assets

Perfect for Your Business:

Commercial, Retail, Warehousing and more

- Expandable to 128 zones for greater flexibility – one platform in three models to suit your requirements

Automatic Protection

- Automatic Arming and Disarming allows the system to maintain a high level of security with less user intervention
- Smart Auto Arming feature checks if anyone is on the premises before attempting to automatically arm the system
- Auto Partial Arm allows the system to automatically secure the perimeter of any area in the system at a preset time while still allowing free movement inside

Advanced Features

- Keyless door entry option available to manage staff access to restricted areas
- Access Control features now include Forced Door, Door Open Too Long (DOTL) and Request To Exit (REX) input for improved security
- Disable Bypass For Force Arm Zones feature can provide greater security by ensuring selected zones remain active even if other convenience features (i.e. Force Arming) would normally disable the zone

Build your business on solid foundations

The Hills Reliance security system is designed with proven technology by world-class engineers to deliver safety and peace-of-mind.

Simple to use - PIN codes with different authority levels allows you to manage and track who operates the security system

For areas requiring increased levels of security the system can monitor them 24/7 - even when the system is disarmed.

Any intrusion attempt can be reported to an Alarm Monitoring Station that can send a patrol officer to investigate. Feel secure knowing your business is protected around the clock., regardless of interest rates and stock exchange prices. One less thing to worry about means you've got time for more important things like growing your business.

Build your business on solid foundations

With over 100 features the system can be fully programmed and customized depending on your requirements. Just like your business, the Hills Reliance will expand and grow to meet changing needs.

You never know what you may need, so we built it all. Add functionality as you need it, where you need it. Optional expansion modules include:

- Wireless Expanders and sensors – add additional detection devices in hard-to-cable locations and boost your security coverage
- Keyless Door Entry – open doors and access secure areas by “swiping” a card across a reader, saves time and offers convenience
- Additional code pads – add more code pads as your business grows, dividing your physical premises up in to “areas”, and even talk to staff around the office using the new VoiceNav code pad with advanced touch interface
- Keychain remotes – stylish remotes are available to turn your system on\off with one button press, open gates and garage doors, and turn lights or other devices on\off
- Output and Relay Expanders – turn other devices on\off (e.g. air-conditioning, signs, lighting) with built in schedules or when you turn the system on\off
- Zone Expanders – add extra zones to your system allowing cost-effective upgrades as you need them

Hills Reliance Optional Accessories

VoiceNav Code Pad

Icon Code Pad
